

Sustainable Community Design: a Narrative Tour of Innovative Sustainability Projects

An evening of creative dialogue which focuses in on sustainable design methodologies. Whether you are interested in 'triple bottom line' accountability for large scale design or simply developing a lifestyle choice that fits with where you wish to live- the principles are the same. With a particular focus on the barriers that have been historically faced within Regulatory Authority processes, user friendly cost analysis, and innovation challenges....this course is meant to look at the main issues and potential solutions which face our communities as we work towards sustainable design. Consider this as a personal or professional opportunity as we all look at ways in which we can build community capacity.

This course is delivered in partnership with O.U.R. ECOVILLAGE, a sustainable learning community and demonstration site committed to a path of resiliency, compassionate action and healthy interdependence where learning a new way to live with one another that honours the earth, personal and community development, inclusiveness, balance and prosperity is paramount. O.U.R. ECOVILLAGE is a call to rise and create a stewardship of sacred knowledge and sense of place. Through our local, regional and global partnerships we seek to co-create accessible models of sustainable living. We provide a nurturing space to support social, physical, cultural, spiritual and ecological well-being for ourselves, the land and our broader community.

PLEASE NOTE: Registration can be found at <http://ourecoovillage.org/our-activities/royal-roads-university/>

Length: 3 hours at RRU
Date: Thursday, May 6, 2010
Times: 7pm-10pm
Cost: \$40 + GST
Please Register By: Thursday, April 22, 2010

To Register:

Register online at <http://www.royalroads.ca/continuing-studies> using Visa or MasterCard; or by telephone, Monday to Friday, 9:00 a.m. – 4:00 p.m. at **250-391-2600, ext. 4801**; or **Toll Free at 1-866-890-0220**. Or, come by in person to the Continuing Studies reception area in the **Grant Building, 2005 Sooke Road**, Victoria, BC, Canada V9B 5Y2.
